They can discourse fluently upon the hotels and principal sights of the city, even tell you of the trains and the con-nections they make, or describe the small stations through which they passed going there. If you have ever known a man or woman like this, then you have met a mental traveler. Activity of Sugar and Heaviness of the Rallways Were the Features.

New York, March 8 .- The features of the share speculation to-day were the great strength and activity of American Sugar and the heaviness of the general rallway Het. American Sugar figured for 96,400 shares and the stock advanced almost steadily from 95% to 8%. There was good buying throughout, some of the purchases being tracedto parties connected with the insiders. The feeling on the stock was bullish, owing to the advance in refined, which nereases the margin of profit to the company. The stock closed buoyant within a fraction of the highest reached.
